OUR PEOPLE

PFG Australia is the sole distributor of Deutz-Fahr tractors. Investment in our people is key; we guide and challenge our personnel to lead the industry through customer centric innovation and support. Comprehensive regional presence ensures our ability to deliver in-market activity in an efficient manner for Deutz-Fahr customers and dealers alike.

Deutz-Fahr's product range in Australia is backed by first-rate, factory trained technicians and staff. Service and warranty support are provided to our dealer network, along with front line training modules via dedicated in-house programs.

DEUTZ-FAHR LINEUP

Deutz-Fahr's expansive tractor program, ranging from 50 to 336 hp, offers the matching tractor for each and any field of application and farm size. These proven configurations are designed to face real-world challenges and a broad selection of variants make our tractors unique and practical workhorses.

Bold, sturdy footprint Warrior models provide deluxe operator comfort, acceleration and dynamic driving behaviour. Then our mid-to-large series of Agrofarm, 5G and Agrottron tractors are proven industry performers, offering three distinct transmission variants.

Superior efficiency is the hallmark of Deutz-Fahr's utility range, featuring cab or ROPS options, while the ever-popular specialist models – Agropius and TTV – are designed for fruit growers, vineyards and orchards.

INNOVATION

Tomorrow's technology today. Renowned across the globe for unwavering commitment to engineering excellence and new product development, the next generation of Deutz-Fahr tractors will embody the essence of innovation.

DEUTZ-FAHR

WARRIOR

DEUTZ-FAHR

8280 IV
WARRIOR

A Deutz tractor is shown from a low angle, positioned on the right side of the frame. The tractor is black with a prominent silver grille and headlights. It is situated in a vast, green agricultural field that stretches to the horizon. The sky is a mix of blue and orange, indicating a sunset or sunrise, with scattered white clouds. The overall scene conveys a sense of power and productivity in a rural setting.

AGROTRON 6 SERIES WARRIOR

ENGINE

Latest Stage V fuel-efficient 6-cylinder DEUTZ engine with NO AdBlue and NO DPF.
Series ranges in output from 171-230hp.

TRANSMISSION

Two transmissions are available, the RC-Shift auto powershift variant
or easy-to-use, superbly engineered TTV variable transmission.

CABIN

The Giugiaro-designed MaxiVision Pro cabin offers deluxe operator
comfort via auto air-con, armrest control, cab suspension,
Trimble Powered GPS and much more.

AGROTRON 6G SERIES

ENGINE

Tier III DEUTZ 6-cylinder common rail engines deliver superior power and performance. Series ranges in output from 147-203hp.

TRANSMISSION

Choose 40km/h powershift or 50km/h RC-Shift auto powershift. Each transmission features outstanding speed selections with 17 gear options between 5-20km/h.

CABIN

Fitted with cab suspension and air-conditioning, step inside to experience a spacious, comfortable, ergonomic and user-friendly work environment. Deluxe Grammer air seat is standard.

PRECISION AG

PFG Australia offers Trimble Powered Precision Ag products to suit both Steer Ready and Non-Steer Ready Deutz-Fahr tractors.

Trimble has a positioning service for all agricultural needs, no matter what you farm, how you farm, or where you're located.

Confidently stay on the line for all applications the first time, every time.

QUALITY

Deutz-Fahr upholds stringent factory quality control measures to ensure that each tractor meets the highest standards of precision and reliability.

From the initial stages of production to the final assembly, a comprehensive quality control process is implemented to scrutinise every component.

Advanced testing technologies and meticulous inspections are employed to identify and rectify any potential issues, guaranteeing that each Deutz-Fahr tractor leaving the factory floor adheres to the brand's reputation for excellence.

Deutz-Fahr tractors' quality and engineering converts downtime into quality time, with the addition of complete service contracts and extended warranty available.

EFFICIENCY

Deutz-Fahr tractors are renowned for their impressive fuel efficiency, setting a benchmark in the agricultural machinery industry. With advanced engine technologies and a commitment to sustainable farming practices, Deutz-Fahr has engineered tractors that deliver optimal power while minimising fuel consumption.

CULTIVATION

"It's a very comfortable tractor to drive and very quiet. The climate control and auto-steer work very well and for hay baling the auto shift transmission is really handy. The step up in the working environment makes a difference."

- ALAN GREAVES (DEUTZ-FAHR AGROTRON 6165 RC-SHIFT WARRIOR)

CROPPING

"We love the horsepower and it covers the ground beautifully. I've done the majority of the driving ... it's up to about 390 hours of work so far. It's only four and a half metres long, so that makes it great for spraying, and we've got a ten tonne spreader and it hauls that really well, too."

-TOM MARTIN (DEUTZ-FAHR 6215 RC-SHIFT WARRIOR)

"Normally I just fill it up and off we go but I have noticed the better fuel economy with the 6G. It has 147 horsepower and that's plenty for what I need. We give our tractors a fair workout, with all the attachments we have and different kinds of contracting."

-JACK RICHMOND (DEUTZ-FAHR 6145G RC-SHIFT)

"As soon as the TTV became available I ordered it. I was in love with it straight away. The normal size of the cabin means you don't have to compromise, plus it has variable speed and a truckload more options - say no more, really."

-KEVIN FINNEMORE (DEUTZ-FAHR 5D TTV)
